TEAM ID	LTVIP2026TMIDS90614
PROJECT NAME	iRevolution: A Data-Driven Exploration of Apple's iPhone Impact in India Using Tableau
MAXIMUM MARKS	4 MARKS

6.3 - Data Preparation:

Data Preparation is a crucial stage in project development that involves collecting, cleaning, transforming, and organizing raw data into a structured format suitable for analysis and visualisation. In data analytics projects, the quality of insights directly depends on the quality of prepared data.

No of Unique Visualizations

The number of unique visualizations that can be created with a given dataset. Some common types of visualizations that can be used to analyze the performance and efficiency of a project include bar charts, line charts, heat maps, scatter plots, pie charts, Maps, etc. These visualizations can be used to compare performance, track changes over time, and show distribution, and relationships between variables.
