## 5.4 - Team Management Tools for Agile Planning

### What is Jira?

Jira is an Agile project management and issue-tracking tool developed by Atlassian. It supports Scrum and Kanban methodologies, helping teams plan, track, and release software efficiently.

### Jira Project Structure for Internship

### Project Creation

### Create a project with:

- Project Name: Internship Capstone Project
- Template: Scrum (Recommended)
- Project Type: Software Development

### Issue Types Configuration

### Define standard issue types:

- Epic – Major project phases
- Story – Feature or functionality
- Task – Smaller implementation steps
- Bug – Errors or defects
- Sub-task – Breakdown of tasks

## Sprint Planning Structure

- **Sprint Duration**
  - 2 Weeks per Sprint
  - Total: 4–5 Sprints (Project Phase)
- **Sprint Workflow**
  - Create Sprint in Backlog
  - Add Stories/Tasks to Sprint
  - Assign Tasks to Interns
  - Set Priority (High/Medium/Low)

## Customize workflow:

- To Do
- In Progress
- In Review

## Agile Boards in Jira

- **Scrum Board**

**Used for:**

- Sprint planning
- Daily standups
- Tracking sprint progress

## Agile Reports for Monitoring

Jira provides built-in reports:

- 📊 Burndown Chart – Sprint progress tracking
- 📈 Velocity Chart – Team performance
- 📋 Sprint Report – Completed vs pending work

Gayathri Educational Society
ESTD-2001

- 🐞 Bug Report – Defect tracking

**Mentors can review reports weekly to evaluate progress.**

## 👥 Role-Based Access

**Define permissions:**

## ✅ Benefits of Using Jira

- Structured Agile Planning
- Clear Accountability
- Transparent Sprint Tracking
- Performance Analytics
- Real-time Status Visibility
- Industry-standard project management tool

## Final Outcome

By implementing Jira for Agile planning, the internship project will follow:

- Scrum-based sprint execution
- Organized backlog management
- Efficient task delegation
- Measurable progress tracking
- Professional software development workflow
