PROJECT NAME	iRevolution: A Data-Driven Exploration of Apple's iPhone Impact in India Using Tableau
MAXIMUM MARKS	4 MARKS

6.4 - Dashboards:

Dashboards are interactive visual interfaces that present key insights, trends, and performance indicators in a clear and structured format. In this project, dashboards were developed using Tableau to visually represent Apple's iPhone market performance in India.

The dashboards help transform complex datasets into easily understandable visual insights, enabling effective analysis and decision-making.

Dashboard 1: iPhone Sales & Revenue Analysis

Objective:

To analysis overall sales performance, revenue growth, and year-wise trends of iPhones in India.

Data Used:

- Year
- iPhone Model
- Units Sold
- Revenue Generated
- Average Selling Price

Key Visualizations Included:

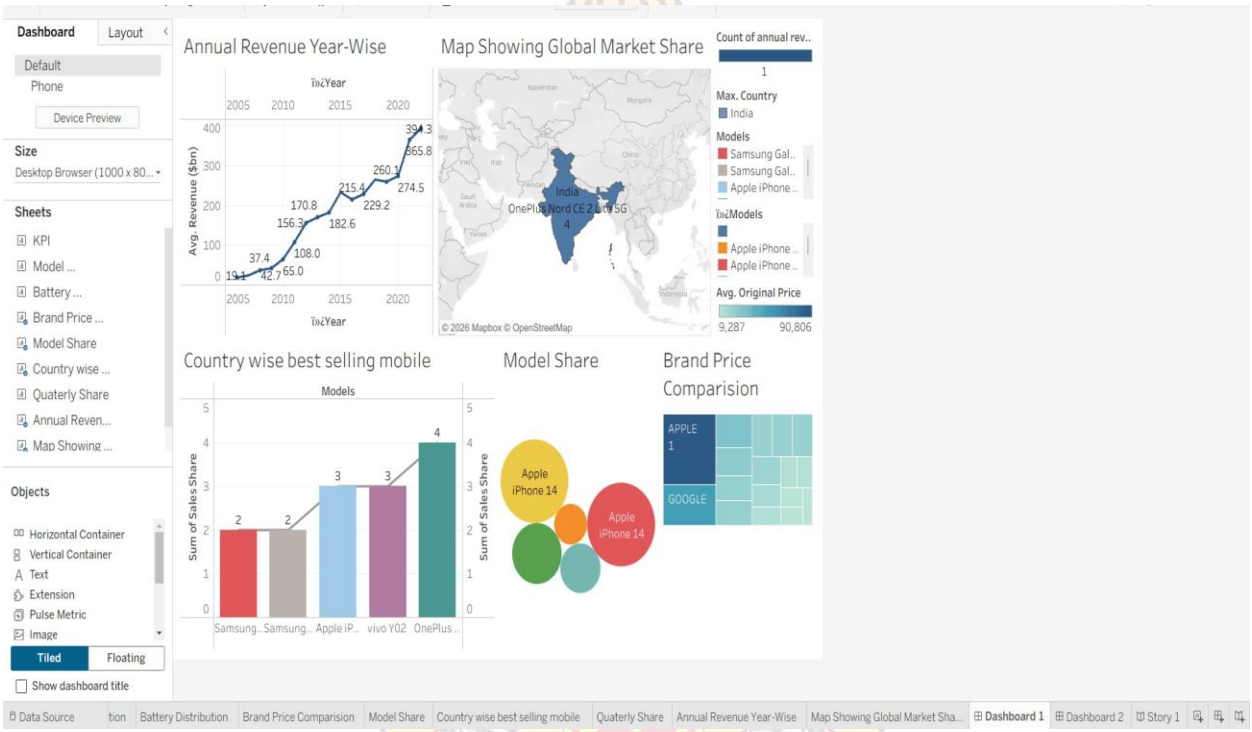
- Line chart showing year-wise sales growth
- Bar chart representing revenue comparison by year
- KPI indicators (Total Sales, Total Revenue, Growth %)
- Model-wise sales distribution

Gayathri Educational Society
ESTD-2001

Insights Derived:

- Identification of peak sales years
- Revenue growth trends over time
- Contribution of different iPhone models to total sales
- Impact of pricing strategy on revenue

Dashboard - 1:



Dashboard 2: Regional & Market Share Analysis

Objective:

To examine regional sales distribution and market positioning of iPhone in India.

Data Used:

- Region/State
- Units Sold (Region-wise)

Gayathri Educational Society
ESTD-2001

Key Visualizations Included:

- Map visualisation showing regional sales distribution
- Pie chart representing market share comparison
- Bar chart comparing iPhone with competitor brands

Purpose of Regional Analysis

- Identify high-performing and low-performing areas
- Detect regional demand patterns
- Understand geographic customer behaviour
- Evaluate regional profitability
- Optimize logistics and distribution
