6.6 - Creativity (Font and Style):

Creativity in dashboard design refers to the thoughtful use of visual elements such as fonts, colours, layout, alignment, and styling techniques to enhance clarity, engagement, and professionalism. In data visualisation projects, creativity does not mean excessive decoration; rather, it involves designing dashboards that are visually appealing while maintaining readability and analytical focus.

In the project *"**iRevolution: A Data-Driven Exploration of Apple's iPhone Impact in India Using Tableau**,"* creativity was applied carefully in font selection, colour themes, layout structure, and overall styling to ensure a clean, modern, and brand-aligned presentation.

1. Importance of Creativity in Data Visualization

Creative design improves:

- Visual appeal
- User engagement
- Information clarity
- Professional presentation quality
- Brand consistency

According to visualisation understanding and reduce cognitive load.

2.Font Selection

a) Font Type

- Arial
- Calibre
- Helvetica

b) Font Hierarchy

A structured font hierarchy was maintained:

- Large bold fonts for dashboard titles
- Medium-sized fonts for headings
- Smaller fonts for axis labels and descriptions This

hierarchy ensures proper visual flow and emphasis.

c) Consistency

The same font style was used throughout all dashboards to maintain uniformity and professionalism.

Font selection is a critical element of visual design and data presentation. From a theoretical standpoint, font selection is grounded in principles of typography, visual hierarchy, and cognitive psychology, which emphasis how textual elements influence comprehension.

3.Colour Scheme and Styling

a) Brand-Inspired Colour Palette

A minimal and premium color palette inspired by Apple's brand identity was used:

- Black
- White
- Grey tones

b) Contrast and Readability

High contrast between background and text ensured readability. Light backgrounds with dark text improved visibility.

c) Highlighting fiey Metrics

Important KPIs such as Total Sales, Revenue, and Growth Rate were highlighted using bold colours or larger font sizes to draw attention.

2. Layout and Alignment

Proper layout design was maintained by:

- Using grid alignment for charts
- Ensuring balanced spacing between elements
- Avoiding overcrowding of visualisations
- Grouping related charts logically

This improved dashboard clarity and visual balance.

3. Use of Icons and Formatting

Minimal use of icons and formatting elements such as:

- KPI cards
- Borders and containers
- Clean separators
- Consistent margins

were applied to enhance structure without overwhelming the viewer.

4. Consistency Across Dashboards and Story

To maintain visual identity, the same:

- Font styles
- Colour themes
- Formatting rules
- Chart styles

were applier across all dashboards and story points, ensuring a cohesive and professional look
